I am a curious, detailed and passionate person, I love learning new things, on any subject but more specifically in technology, I am fascinated by the IT world, I could spend all day without problems in front of the computer solving problems, fixing bugs or simply creating and innovating in some new product, I love web development because it lets my imagination run wild and allows me to make whatever my mind creates real.

COMPETENCIES

- Stress management
- Problem resolution
- Teamwork

English ▬▬▬▬▭▭

Technologies: HTML, CSS, JavaScript, React, React-Redux, NodeJS, Express, SQL, Postgres

Instituto Tecnológico Superior P'urhepecha

2016 - 2018
Zamora, México

Bachillerato Fisico-Matematico
Colegio Zamora

PROFESIONAL EXPERIENCE (no tengo experiencia laboral en tecnología)

Jan. 2022 – July 2022

SoyHenry
I am a Junior programmer so I do not have work experience as a web developer and since it is the topic that interests me here I will write only the experience that I have and that I have obtained on my own and within the web development bootcamp

FRONT END

- I have experience making SPA(single page aplication) con Javascript (ES6) y React(components, hooks) con Redux y React-Router-DOM
- Stylized with CSS and the semantics of HTML
- API REST call from the front-end with fetch or axios.
- Validation forms with React.

BACK END y DB

- Armed routes with Node & express
- Create data base and connect it to the back through the ORMs in this case with Postgres.
- Create information in routes of back and save it in the data base (SQL)

DB

- Handling of relational tables with SQL, to access to the data base through the comands of the language and bring information with specific features, relate tables, mix them, etc, etc.
